The survey of death and murder resulted from addiction, smuggling drugs and psychelic drugs

Sarrami, H.1

Abstract
The subject of addiction, drugs and psychelic drugs from the point of view of diseases, the prevalence of offences, and unfortunate death among addicted people directly and indirectly is important for families. Death resulted from committing suicide, murder, dying in struggles, martodym of law enforcement forces and hanging smugglers is the problem of this matter. This research tries to survey deaths that are directly and indirectly related to the addiction and counts the negative points of it on economy, culture, society and … it coud say that addiction causes many problems for all people. If the government wants to reduce the rate of deaths, it must invest in prevention and solve the problems of people.

Keywords: drugs, death, murder, smuggle
